PROJECTS

Weather Web Application Feb 2025 – Apr 2025

- Developed a responsive web app that displays real-time weather data using APIs.

Adaptive Traffic Flow Optimization System Sep 2025 – Dec 2025

- Developed a smart traffic signal system to optimize traffic flow based on real-time conditions.
- Implemented dynamic signal timing logic to reduce congestion and waiting time.

Plant Disease Detection Using Machine Learning Feb 2026 – May 2026

- Developed an ML-based system to detect plant diseases from leaf images.
- Used image processing and classification techniques for accurate disease detection.

Grandparent Guardian – Scam Call Interceptor System Apr 2026

- Developed an AI-based scam call detection system using speech-to-text and machine learning to identify fraudulent calls and alert users in real time.

AI Agent Smart Farming Advisory System (Ongoing) Aug 2026 – Dec 2026

- Developing an AI-powered system for crop, fertilizer and weather advisory.
- Implementing AI agents to provide personalized farming recommendations.
